Basement.

BLAKE OF THE IRISH BRIGADE

Picturesque Career of a Soldier of Fortune and Misfortune.

SAW FIGHTING ON TWO CONTINENTS

A West Pointer Who Fought Apaches with Crook and Miles—Adventures in South Africa—An Inglorious End.

A career embracing high soldierly qualities, an untamable adventurous spirit and literary ability above the average, came to an inglorious close in the accidental death of Colonel John F. Y. Blake in New York City a short time ago. A picturesque character, a soldier of fortune and misfortune, he fought for freedom on two continents with the valor and enthusiasm of a warrior born.
Colonel Blake was known to all readers of newspapers as the commander of the famous Irish Brigade that was recruited in Johannesburg and Pretoria to assist the Boers in the war with Great Britain, but it was not until after the Boer war had ended that the majority of his fellow countrymen realized that this was the same Blake, who, after graduating from West Point, had served under Crook and Miles in the Apache wars and had later been in command of the Apache Indian scouts.
Two great passions appear to have directed the main current of the man's life, relates the New York Evening Post: his love of adventure and his hatred of England and Englishmen. Born in 1854 on a cattle ranch in Denton county, Tex., young Blake, like many another American of Irish descent, was more incipient of everything British than the most earnest worker in the ranks of the Land League in the old country.
When he was 30 years old and a student in the Arkansas State university at Fayetteville, he secured an appointment from Representative Gunter as cadet to the United States Military Academy at West Point. At his graduation in 1880, Blake was assigned as second lieutenant to the sixth United States cavalry, which was stationed at that time in Arizona. His love of fighting and of adventure was soon in way of being satisfied, for the Indian campaigns kept him busy. In 1885 he and his scouts were called from the mountains and he was ordered to Fort Leavenworth. There he passed through the infantry and cavalry schools and was promoted to the rank of first lieutenant, and was ordered to Fort Wingate, N. M.
But, as he himself has said, "the Indians remained quiet and peaceful on their reservations, and post life became monotonous, so I resigned in 1885."
Next he tried business in Grand Rapids, Mich. But that also was tame and monotonous to a man of Blake's temperament, and after a year or two he looked for something else to do that would furnish excitement as well as profit. In 1894 he decided that he had found what he needed. To men who were willing to risk something and to suffer something, South Africa was calling, and the cry with which it called was the single word "Gold."
Blake heard that cry in Grand Rapids and found it too strong to go unheeded. By this time he had a wife and children. His wife implored him to remain in America. Her family, the Aldrichs of Michigan, were wealthy and influential in affairs. If business did not appeal to him, there were other careers that could be followed in the United States. He could not explain. Adventurers, soldiers of fortune from the four corners of the earth, were hurrying to golden Rhodesia, and John Blake must join that army even if it meant the sacrifice of home and of wife. And that sacrifice had to be made. In the end, for Mrs. Blake having threatened to bring suit for divorce on the ground of non-support if her husband left her, put the threat into execution. Blake did not contest the suit.
On December 1, 1894, he sailed from New York, and after spending a short week in England, embarked at Southampton on December 22 for Cape Town. He did not remain long in Cape Town, but pushed on to Johannesburg, the big, bustling and prosperous city of the Transvaal. One month in the city and he set off for Bulawayo, the gold center, 60 miles away, traveling with four pack donkeys. Dissatisfied with the town, which he found generally fever-stricken, he penetrated into the jungles of the Zambesi, exploring the surrounding country.
As a miner and prospector Blake appears not to have been any more successful than in his former ventures, but when, in October, 1896, the British agent at Pretoria announced that his government declined to discuss the conditions set forth in the Boer ultimatum, and war became imminent, "Blake, soldier, lover of adventure and lover of Great Britain, fell at once into his place."
The Irish brigade became an important factor in the war from the very beginning, for the 200 men who called on Blake to lead them lost no time in getting into action.
High Praise for Buller.
In his work entitled "A West Pointer with the Boers," Blake has given his idea of the importance of the work accomplished by the generals on both sides. Of Buller, he says:
"The Boers generally acknowledge General Buller as by far the ablest commander the English had in the field. True it is, he made mistakes on the Tugela. But it should be remembered that he had but 3,000 or 4,000 men to dislodge some 6,000 Boers entrenched for a distance of thirty miles along the river. Had Buller been in supreme command, I firmly believe the war would have been brought to an end within six months after the relief of Ladysmith."
"Lord Roberts and Kitchener had twice the number of men, an open country, and only about 4,000 Boers in front of them; yet Buller relieved Ladysmith by the time they could relieve Kimberley."
In fighting negroes armed with sticks, both Roberts and Kitchener were enabled to add a list of letters to their names almost equal to the number in the alphabet; but when confronted with an armed Boer,

WALKING BEFORE THE FLOOD

Bold Attempt to Travel 1,500 Miles of River Water.

PROGRESS SLOW AND VERY DIFFICULT

Preliminary Trials on the Route from Cincinnati to New Orleans—Shoes of the Hardy Navigator.

Never since back in the early part of the '90s, when Captain Paul Boynton, attired in a rubber suit inflated like a pneumatic tire, floated down the Ohio river has any man performing feats on the water attracted half so much attention along that coast as is now being paid to Prof. Charles Oldrieve, the wave walker, who is attempting the novel feat of walking on the water down the Ohio and Mississippi rivers from Cincinnati to New Orleans, a distance of 1,533 miles, in forty days, on a wafer of \$5.00. Of no less interest to the public than the success of his bid, which he declares she is the champion oarswoman of the world and who in a skiff is following her husband on his novel and perilous trip, keeping near enough that she could rescue him in case he should fall, in which event, on account of the buoyant moccasins he wears, he would drown in a few moments.
The mind of man runneth not beyond the time when daring and hazardous feats on and in the water failed to attract wide attention. Water sports were as popular with the ancients as they are today. The sportsman likes the water because it does not knock his brains out when he falls.
Swimming the English channel, jumping from Brooklyn bridge and "shooting" over Niagara falls are feats which have claimed hundreds of hapless victims. And still there are hundreds more who are willing to risk their lives in such attempts for the sake of success. To be a hero and riskless souls the water has a peculiar fascination. The "handlubber" cannot understand the fearlessness with which these attempts are made. Numerous devices, some successful and some death traps, have been invented to aid man in these remarkable efforts at conquest. To be a hero and riskless souls the water has a peculiar fascination.
